

UFO Contact Cheatsheet

Preparation

- Build antenna from aluminum foil and coat hangers (pyramid shape works best!)
- Communicate only at 3:33 AM for optimal signal clarity
- Wear tinfoil hat to prevent mind-scanning (fashionable and functional)
- Stock up on freeze-dried ice cream - aliens love it

Communication Methods

- Use binary beeps, the universal alien language
- Broadcast on 422.5 MHz, the secret alien frequency [sic]
- Flash lights in Fibonacci sequence to show intelligence
- Play theremin music to establish peaceful intentions

Meeting Protocols

- Draw crop circles to designate landing zones
- Have cow ready for potential examination (borrowing is fine)
- Disable all electronic devices except those recording proof
- Bring universal translator (Google Translate works in a pinch)

Safety Measures

- Establish Earth-human safe word: "Zuckerberg"
- Maintain 10-foot distance to avoid probing incidents
- Record encounter on multiple devices that will mysteriously malfunction
- Prepare cover story about weather balloons for authorities

Post-Contact

- Document encounter in detailed blog no one will believe
- Check for implants behind ears and other... places
- Expect missing time and strange recurring dreams
- Prepare for government agents in black suits (they always wear sunglasses indoors)

Common Mistakes

- Confusing weather phenomena for actual UFOs
- Forgetting to ask for interstellar travel technology
- Mentioning Area 51 (major alien faux pas)
- Attempting to take selfies with visitors (they're camera shy)
